

# A Professional Cleaning for your Removable Appliance

It is the goal of this office to provide you with the best possible care for your continued Dental Health.

For our patients who have removable appliances we have instituted the use of the Pro-Clean System. In just a few short minutes during your visit, we will professionally clean and sanitize your appliance.

The Pro-Clean System utilizes a powerful cleaning compound and magnetically driven media to thoroughly scrub your appliance removing stains, tarter and plaque. This cleaning process also produces smoother surfaces that will aid in reducing future build up of plaque, stains and embarrassing odors.

The Pro-Clean System is recommended in conjunction with the normal, daily maintenance of your appliance. To best protect your appliance, a professional-grade cleaning should be performed at least every six months.

We trust you will appreciate the addition of this valuable service. Our goal is to provide you the best possible oral health as we extend the life of your removable appliance.

Sincerely,  
Your Dental Team
